The default precision point is 5. If the last trailing digit is "5" you can use the "round half up" and "round half down" options to round that digit up or down when you change the precision point. For example 0.875 with a precision point of 2 rounded half up = 88/100, rounded half down = 87/100. select a precision point: 1 2 3 4 5 6 7 8 9

According to the ASA, there is widespread agreement that p-values are often misused and misinterpreted. One practice that has been particularly criticized is accepting the alternative hypothesis for any p-value nominally less than .05 without other supporting evidence.Although p-values are helpful in assessing how incompatible the data are with a specified statistical model, contextual factors
