Having treated thousands of clients over more than a decade and supervised hundreds of trained physiotherapists in one of Australia's leading health care groups, few people are better positioned to give advice on physical health and wellness than International Author and Speaker Jason Smith. The more traditional physiotherapy practice models observed at the time certainly did not reflect these found values or philosophies of care. Back in Motion Health Group commenced as a small practice in the home of founders, Jason and Paulina Smith, in September 1999. Their early success resulted in quick growth and by April 2000 had moved the practice from their home into more suitable commercial medical facilities. An expert and committed team soon gathered around Jason and Paulina as they focused on emerging as one of the choice physiotherapy providers and employers in our industry.

A Curated Guide: SEOUL-Robert Koehler 2019-01-30

Real Places. Real Life. Real Seoul. A Local Guide to the Hottest City in Asia What's the best way to tour around a foreign city? Unless you want to pilgrim through the obvious landmarks and take typical vacation shots at tourist restaurants, the best and the safest way would be to get help from a reliable local friend, especially if you plan to explore a newly emerging city in constant change like Seoul. But what if you don't have a reliable friend in Seoul? A Curated Guide: SEOUL, put together by a local editor and expat authors, will gladly be your friend. There's more to Seoul than palaces, bibimbap, K-pop, and soju Authors Robert Koehler, former editor-in-chief of SEOUL magazine, and Hahna Yoon, former editor of Time Out Seoul, have long been introducing Seoul's kaleidoscopic aspects to readers around the globe. Their insights in identifying the hidden gems of the city as well as their social, cultural, historical, and artistic knowledge have already been verified by the readers of their magazines, and Robert Koehler's last book, Seoul Selection Guides: SEOUL, even topped Amazon's Seoul tour guides category. Through this book, the two authors sought to present a selective curation distinguished from the humdrum travel information galore on and offline. Deviating from the beaten paths suggested by every previous Seoul guidebook, they curate lesser known enchantments: time-forsaken back alleys and exclusive local shops. While they don't avoid famous sites altogether, they recommend spots according to their personal experiences rather than popularity, catering to various tastes. From elegantly aged hanok to the hippest clubs in town, the book covers a wide spectrum of interests and preferences. Locals share the very best Asia's hottest metropolis has to offer A Curated Guide: SEOUL is comprised of 10 sections: Neighborhoods, Historic Architecture, Arts & Culture, Dining, Cafés & Teashops, Nightlife, Nature, Shopping, Experiences, and Accommodations. Want to get a rough idea of the huge metropolis and its layout? Warm up with the "Neighborhoods" section exploring the nine trendiest neighborhoods of Seoul. The authors' favorites are Euljiro, where the atmosphere shifts dramatically from day to night, and Seongsu-dong, known as the "Brooklyn of Seoul." If you want more in-depth stories about life and culture in Seoul, check out the essays and interviews of a local architect, indie musician, chef, coffee expert, and DJ featured in the book. With more than 400 photos of vivid moments in the city, the guide offers a fresh perspective on Seoul for travelers, expatriates, or anyone who is simply curious about the city.

AfterCulture-Jerry Herron 1993

AfterCulture is a book of essays about the making and un-making of middle-class culture, a phenomenon which has occurred nowhere more decisively than in America's most representative city, Detroit. In this insightful book, Jerry Herron analyzes what has happened since the decline of middle-class culture in Detroit, a city he labels the first postmodern city, because it exemplifies the failure of traditional history to make sense of contemporary urban experience. By looking at media coverage of the city, violence, urban rehabilitation projects, and the proliferation of suburban shopping malls, the book traces the divestiture of Detroit and helps make sense of the plight of America's cities.

Happiness from "Me" to Myself-Muhammet TAŞDEMİR 2019-12-29

Happiness is not a process that you need to continue by satisfying yourself. On the contrary, it is a journey in which you need to achieve good and beautiful things for both yourself and for the World continuously. In this journey, you need to move the World and yourself to a better point and to gain as much as awareness you can. It is important to continue your journey with a clear mind. Because everything you are going to gain in this journey is based on your successes which are gained by not let your belief go. Happiness is not a process you can gain just by waiting for messages from the universe or by relaxing your mind with wealthiness. Of course, to have an intention toward what you need to do is important. However, intend is the beginning point. You can not progress only by intending and waiting for spiritual things. What is important is every night when you put your head to your pillow, to say that "I have accomplished something today" or "I have added beauties to myself and to the World today" You should believe in yourself, think with a clear mind, protect your boundaries, have a balanced life and show

some effort to achieving your goals. If you do these in a planned manner, you can do everything you can. In this book, called "Happiness To Me From Myself", I have explained all of these with a clear language, by trying to show details with different section. If I would wait for fort he universe to send me a message, I could not do that, and you could not hold this book in your hands. This book was a goal for me and I achieved this. Now, it is your turn! You should consider everything in-universe as tools, trust in God, have an intend, create goals and gain success. I hope this book can help you to create a journey of happiness, which is full of successes!

But traditionally, retrospectives (also known as "post-mortems") are only helpful at the end of the project--too late to help. You need agile retrospectives that are iterative and incremental. You need to accurately find and fix problems to help the team today. Now, Derby and Larsen show you the tools, tricks, and tips you need to fix the problems you face on a software development project on an on-going basis. You'll see how to architect retrospectives in general, how to design them specifically for your team and organization, how to run them effectively, how to make the needed changes, and how to scale these techniques up. You'll learn how to deal with problems, and implement solutions effectively throughout the project--not just at the end. With regular tune-ups, your team will hum like a precise, world-class orchestra.

Not Your Everyday Stories: Part One-Christopher Thompson

The Retro-Survivalist Handbook - Revised-Donald Bobbitt 2018-01-29

This book, *The RETRO-SURVIVALIST HANDBOOK, TAKING CONTROL* one of a series and is specifically designed to be a quick reference for those of us that I call Retro-Survivalists. So what is a Retro-Survivalist? A Retro-Survivalist is someone who feels that there must be; healthier, cheaper and safer ways to do things in this modern world of ours than what is thrust at us by the big corporations of the world. Retro-Survivalists also believe that even though we humans have a longer life expectancy than ever, we are literally inundated, every day of our lives, with products that are loaded with strange chemicals and additives. And we feel that our bodies should not be subjected to foods or especially medicines with ingredients that have so many dangerous side effects just so the; growers, producers and packers can make even larger profits. A Retro-Survivalist is someone who believes that at least some of the more NATURAL ways of living and taking care of ourselves that were popular in the times of our ancestors are probably still applicable today. We want to stop being misled by advertisers and know exactly what we are being fed and treated with. We not only want to know what the corporations are putting into our foods and medications, but we also want to have other healthier options available to us so we can make our own choices. We want clearly defined options that we can select from that also clearly explain any potential health risks of our selection options. We want more natural foods, and access to safer methods to grow and prepare our own foods, as well as ways to treat the simpler human illnesses like our forebears did. The Retro-Survivalist also wants to know how to treat the more common ailments with safer and more natural plants, oils and supplements rather than with synthetically manufactured drugs and medicines that are full of numerous potentially hazardous ingredients. Many of these new drugs and their ingredients are introduced to the public as being true wonders of science, at first, only to be shown to have disastrous side effects when used over a long period of time. The

Retro-Survivalist does want to enjoy his or her modern conveniences, especially when it comes to foods and medicines but we also wants to have access to the choices that are more natural and healthy for ourselves and our children. And, if the big corporations will not be proactive and make the nation's health their top priority, then we want access to the knowledge of how to grow our own, healthier foods in some limited manner where we control the process ourselves. I have so far structured this book into three Volumes of information. I plan to come back and not only expand on the information provided in the near future, but to even add several more Volumes. This book, BOOK-I, TAKING CONTROL has a relatively simple construction and is laid out as a progression of useful information, in chapter format. It is not designed to teach you, the reader, how to just "read the book and then "go off of the Grid," living a self-sustained lifestyle. Instead it is designed to provide information and ideas that can help you understand how to buy safer and healthier foods, how to grow some of your own foods, and how to make you and your family more self-sufficient and healthy. This book is laid out as a combination of informational chapters interspersed with a number of "How To" chapters.

This thoroughly researched and geeky trip down memory lane pulls together the most entertaining stories from this dynamic era, and brings you the classic tech that should never be forgotten.

No One Can Change Your Life Except For You-Laura Whitmore 2021-03-04

'Funny, positive and life-affirming, Laura is like a PT for your self-confidence.' SARA PASCOE 'Clear-headed advice and relatable honesty.' MATT HAIG 'My favourite kind of book - like a glass of wine with your smart, funny friend.' KATHERINE RYAN 'When I was a kid the first album I owned was by Wilson Phillips. I remember the lyric from the song Hold On, 'No one can change your life except for you'. It's how I've chosen to live my life. There is a freedom when you take back control. Stop waiting for someone to save you and do it yourself. I recognise everyone has different levels of struggle but no one just hands you a chance. We don't have to wait for Prince Charming to rescue us, or wait for the opportunity to come to us. We can be our own heroes. We can create our own dreams.' Laura Whitmore knows lucky breaks come to those who are ready to step into their own power, even when they're feeling nervous as hell about it. In *No One Can Change Your Life Except For You*, she shares her experiences of overcoming heartbreak, body image worries, self-doubt and insecurity. Laura has learned that optimism, self-belief and learning to accept yourself, will bring you more than anyone else can ever give you. And she shows how her own struggles can help you through yours. Frank, heartfelt, inspirational and funny, this is a book to remind you that the hero you are looking for is YOU.

Go, Flight!-Rick Houston 2015-09-28

At first glance, it looks like just another auditorium in just another government building. But among the talented men (and later women) who worked in mission control, the room located on the third floor of Building 30--at what is now Johnson Space Center--would become known by many as "the Cathedral." These members of the space program were the brightest of their generations, making split-second decisions that determined the success or failure of a mission. The flight controllers, each supported by a staff of specialists, were the most visible part of the operation, running the missions, talking to the heavens, troubleshooting issues on board, and, ultimately, attempting to bring everyone safely back home. None of NASA's storied accomplishments would have been possible without these people. Interviews with dozens of individuals who worked in the historic third-floor mission control room bring the compelling stories to life. *Go, Flight!* is a real-world reminder of where we have been and where we could go again given the right political and social climate.
