Mediocracy-Alain Deneault 2018-05-15

There was no Reichstag fire. No storming of the Bastille. No mutiny on the Aurora. Instead, the mediocre have seized power without firing a single shot. They rose to power on the tide of an economy where workers produce assembly-line meals without knowing how to cook at home, give customers instructions over the phone that they themselves don't understand, or sell books and newspapers that they never read. Canadian intellectual juggernaut Alain Deneault has taken on all kinds of evildoers: mining companies, tax-dodgers, and corporate criminals. Now he takes on the most menacing threat of all: the mediocre.

Time, Space and Philosophy-Christopher Ray 2002-09-11

This book provides a comprehensive, up-to-date and accessible introduction to the philosophy of space and time. Ray considers in detail the central questions of space and time which arise from the ideas of Zeno, Newton, Mach, Leibniz and Einstein. Time, Space and Philosophy extends the debate in many areas: absolute simultaneity is examined as well as black holes, the big bang and even time travel. Time, Space and Philosophy will be invaluable to the student of philosophy and science and will be of considerable interest to mathematics students. The clear, non-technical approach should also make it suitable to for the general reader.

Time Present and Time Past-Deirdre Madden 2013-05-28

Fintan Buckley is a pleasant, rather conventional and unimaginative man, who works as a legal adviser in an import/export firm in Dublin. He lives in Howth and is married to Colette. They have two sons who are at university, and a small daughter. As he goes about his life, working and spending time with his family, Fintan begins to experience states of altered consciousness and auditory hallucinations, which seem to take him out of a linear experience of time. He becomes interested in how we remember or imagine the past, an interest triggered by becoming aware of early photography, particularly early colour photography. He also finds himself thinking more about his own past, including time spent holidaying in the north of Ireland as a child with his father's family. Over the years he has become distanced from them, and in the course of the novel this link is re-established and helps to bring him understanding and peace, although in a most unexpected way. Time Present and Time Past, Deirdre Madden's eighth novel for adults, is about time: about how not just daily life and one's own, or one's family's past, intersect with each other.

Time Multiplexed Beam-Forming with Space-Frequency Transformation-Wei Deng 2012-08-23

This book describes a unique approach to smart receiver system design. It starts with the analysis of a very basic, single-path receiver structure, then using similar methods, extends the analysis to a more complicated multi-path receiver. Within the multi-path structure, two different types of phased-array architectures are discussed: Analog beam-forming, and digital beam-forming. The pros and cons are studied, and the gaps are identified. Whereas previous books in this area focus mainly on phased-array circuit implementations, this book fills a gap by providing a system-level approach and introduces new methods for developing smart systems.

Tiny Acts of Love-Lucy Lawrie 2014-03-06

Surviving motherhood? It's all about having the right support network. Lawyer Cassie has a new baby, a husband who converses mainly through jokes, a best friend on the other side of the world, and a taskforce of Babycraft mums who make her feel she has about as much maternal aptitude as a jellyfish. Husband Jonathan dismisses Cassie's maternal anxieties, but is he really paying attention to his struggling wife? He's started sleep talking and it seems there's more on his mind than he's letting on. Then sexy, swaggering ex-boyfriend Malkie saunters into Cassie's life again. Unlike Jonathan, he 'gets' her. He'd like to get her into bed again, too... And on top of all her emotional turmoil, she also finds herself advising a funeral director on ghost protocol and becomes involved in an act of hotel spa fraud, never mind hiding cans of wasp spray all over the house to deal with the stalker who seems to be lurking everywhere she looks. Marriage and motherhood isn't the fairytale Cassie thought it would be. Will her strange new world fall apart around her or will tiny acts of love be enough to get her through? Funny, perceptive and real, Tiny Acts of Love portrays the rawness of motherhood, the flipside of love and the powerful lure of paths not taken. Tin City-David Housewright 2005-05-01

Mac McKenzie is rich. So rich that he's left his job as a Twin Cities police officer and spends his time doing favors large and small for friends. So when an old Marine buddy of his father's calls with a request Mac takes the time to help him out. And it is one of the stranger favors he's ever been asked: the elderly Mr. Mosley, a beekeeper, wants Mac to find out why his bees are suddenly dying in droves. Mac does some digging and before long turns up a hornet's nest of trouble in the person of Frank Crosetti, a new neighbor on the property abutting Mosley's bees. What started out as an innocent investigation into some unregulated pesticide quickly turns lethal. Crosetti sticks around long enough to make some very specific threats, then disappears into the wind leaving behind a vicious rape, a lifeless body, and a very angry McKenzie bursting for someone to blame. With only the faintest of trails to follow and a suspicious group of federal agents gunning for him, Mac dives underground, taking only a stash of cash and a small arsenal with him on his undercover mission. Before long Mac's deep in the forgotten corners of Minneapolis sniffing for any sign of Crosetti, unable to rest until he gets results. Combining engaging humor and wit with action-packed storytelling, Edgar Winner David Housewright's second Mac McKenzie novel is clever, compelling, and thoroughly enjoyable.

Time Series Analysis, Modeling and Applications-Witold Pedrycz 2012-11-29

Temporal and spatiotemporal data form an inherent fabric of the society as we are faced with streams of data coming from numerous sensors, data feeds, recordings associated with numerous areas of application embracing physical and human-generated phenomena (environmental data, financial markets, Internet activities, etc.). A quest for a thorough analysis, interpretation, modeling and prediction of time series comes with an ongoing challenge for developing models that are both accurate and user-friendly (interpretable). The volume is aimed to exploit the conceptual and algorithmic framework of Computational Intelligence (CI) to form a cohesive and comprehensive environment for building models of time series. The contributions covered in the volume are fully reflective of the wealth of the CI technologies by bringing together ideas, algorithms, and numeric studies, which convincingly demonstrate their relevance, maturity and visible usefulness. It reflects upon the truly remarkable diversity of methodological and algorithmic approaches and case studies. This volume is aimed at a broad audience of researchers and practitioners engaged in various branches of operations research, management, social sciences, engineering, and economics. Owing to the nature of the material being covered and a way it has been arranged, it establishes a comprehensive and timely picture of the ongoing pursuits in the area and fosters further developments.

Tisha-Robert Specht 1984-07-01

The beloved real-life story of a woman in the Alaskan wilderness, the children she taught, and the man she loved. “From the time I’d been a girl, I’d been thrilled with the idea of living on a frontier. So when I was offered the job of teaching school in a gold-mining settlement called Chicken, I accepted right away.” Anne Hobbs was only nineteen in 1927 when she came to harsh and beautiful Alaska. Running a ramshackle schoolhouse would expose her to more than just the elements. After she allowed Native American children into her class and fell in love with a half-Inuit man, she would learn the meanings of prejudice and perseverance, irrational hatred and unconditional love. “People get as mean as the weather,” she discovered, but they were also capable of great good. As told to Robert Specht, Anne Hobbs’s true story has captivated generations of readers. Now this beautiful new edition is available to inspire many more. “The memoir reads like an old-fashioned novel, a heartwarming love story with the added interest of frontier hardships and vividly portrayed characters.”—Publishers Weekly

Timor Leste-Andrea Katalin Molnar 2009-12-17

This book provides a comprehensive country overview of Southeast Asia’s newest nation, Timor Leste (East Timor). This book focuses on its cultural and ethno-linguistic diversity, and its political history from the pre-Portuguese period up to 2009. The book pays particular attention to the historical roots of the current challenges to nation-building by reviewing the Indonesian occupation; guerrilla warfare by the Timorese against the occupiers; the politics leading up to the United Nations’ popular consultation and the vote for independence in 2002. Explaining the structure of the government and its parliamentary system, this book highlights the problems and historical and cultural underpinnings of the challenges Timor Leste faces in building a stable viable nation. The author presents a synopsis of selected issues including: language, truth and reconciliation, the Catholic Church’s political activism, internal security problems, the ‘politics of oil’, and the fact that violent conflicts, from 2005 to date, have made it necessary for the United Nation’s peacekeeping forces to return. Thus far, the book argues, Timor Leste’s nation-building efforts have been hampered by the dynamic interaction of number of national and international factors. The first comprehensive political and cultural history of East Timor to date, this book fills a gap and will be an important single reference resource for students and researchers in the field of Southeast Asian Studies, Anthropology and Political Science.

Titanic on Trial-Nic Compton 2012-03-19

On 15 April 2012, it will be 100 years since the Titanic sank. Since that fateful night, stories about the sinking have become legendary - how the band played to the end, how lifeboats were lowered half-empty - but amongst the films, novels and academic arguments, only those who were there can separate truth from fiction. After the sinking, inquiries into the loss of 1,517 lives (out of 2,223 aboard) were held in both the UK and US. The proceedings produced 1,000 pages of transcripts. Some of the testimonies were inevitably less than impartial, but as a whole the transcripts represent the most thorough and complete account of the sinking, told in the voices of those who were there. For the first time these transcripts have been specially edited and arranged chronologically, so that they tell the story of the Titanic's sinking as a narrative, rather than a list of questions and answers in a courtroom. The witnesses are transformed into characters in a much bigger story, and the events are described from different perspectives

of people in every part of the ship, from a stoker in the boiler room escaping his section before the watertight doors sealed behind him, to first class passengers trying to buy their way onto lifeboats. Capturing the disbelief, the chaos and the terror of the disaster, this unique book brings to life the tragedy through the voices of those who survived it.

Time Series Analysis and Forecasting by Example-Søren Bisgaard 2011-08-24

An intuition-based approach enables you to master time series analysis with ease Time Series Analysis and Forecasting by Example provides the fundamental techniques in time series analysis using various examples. By introducing necessary theory through examples that showcase the discussed topics, the authors successfully help readers develop an intuitive understanding of seemingly complicated time series models and their implications. The book presents methodologies for time series analysis in a simplified, example-based approach. Using graphics, the authors discuss each presented example in detail and explain the relevant theory while also focusing on the interpretation of results in data analysis. Following a discussion of why autocorrelation is often observed when data is collected in time, subsequent chapters explore related topics, including: Graphical tools in time series analysis Procedures for developing stationary, non-stationary, and seasonal models How to choose the best time series model Constant term and cancellation of terms in ARIMA models Forecasting using transfer function-noise models The final chapter is dedicated to key topics such as spurious relationships, autocorrelation in regression, and multiple time series. Throughout the book, real-world examples illustrate step-by-step procedures and instructions using statistical software packages such as SAS®, JMP, Minitab, SCA, and R. A related Web site features PowerPoint slides to accompany each chapter as well as the book's data sets. With its extensive use of graphics and examples to explain key concepts, Time Series Analysis and Forecasting by Example is an excellent book for courses on time series analysis at the upper-undergraduate and graduate levels. it also serves as a valuable resource for practitioners and researchers who carry out data and time series analysis in the fields of engineering, business, and economics.

Timeshare Resort Operations-Randall S. Upchurch 2006

This book provides a complete overview of timeshare development and operation models. The authors take a comprehensive look at the present and future of this growing segment of the hospitality industry, including specialized approaches to marketing, human resources, service quality, finance, legal considerations and professional ethics. Timeshare, or vacation ownership, is a relatively recent leisure phenomenon. It emerged in the late 1950s as a way to secure extra capital resources to fund property expansion. Shareholders had the right to use these properties on a regular basis. Although arrangements have grown in complexity and variation, the model allows for customers to buy rights to use a property for a fixed time period each year.

Timeshare arrangements have experienced rapid international growth particularly in the last fifteen to twenty years and are now an important vacation arrangement. Most of the world's major hotel and resort developers now operate timeshare properties. Firms like Marriott, Hilton, Hyatt, Disney and Ramada have brought a new formality and legitimacy to timeshare development and operation. * Covers the fastest growing area in the hospitality industry * Takes operational approach the entire timeshare product, not just marketing & sales * Clarifies the mystery of the timeshare product, cuts through preconceptions
